Subject: Vacation rentals

To whom it may concern,

Reading the proposed amendments to the vacation rental permits I did not see any restriction for the amount of permits per neighborhood. We live in the area called Westcott bay estates and purchased our home to have a home. There are approximately 45 homes in our neighborhood and 4 maybe 5 vacation rentals already that we know of. We think their needs to be a limit per neighborhood to protect the people that have a home to have a home. So far having 10 percent plus vacation rentals around us is only a small nuisance which includes a lot of increased traffic as vacationers are very busy trying to get it all in and occasional noisy parties etc. any increase in permits in our area will compound this problem. We understand the need for rentals as we rented a permitted vacation rental for 12 years before we were able to purchase our home but a cap per neighborhood is only a reasonable request to protect the peaceful existence we bought our home for.

If this email has not reached the right person could you please forward it. We thank you very much for your time.
