Subject: RE: Comprehensive Plan?

Hello,

Yes, the Comprehensive Plan is a very important document. It sets out the foundation for the future of the built and natural environment of the County. We are just beginning the process of updating it, and will be making every effort to educate and engage the community. If you wish to get notices of briefings and open houses, you can sign up to receive notices about the Comprehensive Plan update project activities by subscribing for notices at the link below. Select Comprehensive Plan Update under the News Flash header.

Subject: Comprehensive Plan?

Hi there,

I am writing to inquire about the Comprehensive Plan. My partner and I have recently bought property on the island after being here for quite some time and are surely invested in the future of this place. We belong to the 30 year old and under demographic of the island, so 2035 is hopefully well in our scope of interest. We also recently took place in the Eastsound Vision Planning process led by Fred Klein and word of the Comprehensive Plan made fire around the circle. The problem being that really no one can comprehend, yet explain what is exactly in this document, although it does affect the rules and regulations of this place we call home; taxes, growth, housing, environment and so on. Seems pretty important, huh? Well anyways, would love an explanation of its contents in terms that are understandable and comprehensive. Is there going to be a public hearing on the subject? Look forward to your reply.

Thank you for your time,
Ryan Morris
