Subject: typo in vision statement PC document

comments here are based on

<https://www.sanjuanco.com/DocumentCenter/View/14382>

page 18, line 8, I believe the word “to” was left out of the sentence between “access” and “housing”

More generally, the sentence is poorly worded.

I think the intent is more like:

“This statement was added to reflect an aspiration that lack of access to housing should not prevent anyone from making a life in the islands.”

although IMHO better, my suggested re-wording is still a bit awkward.

It is clear that you and your team and the PC have done an exemplary job in fine tuning the vision statement and showing a careful and professional pathway as to the precise changes that are being suggested.

Thanks much

Joe Symons
