Dear Lynda,

As a climate scientist, I strongly urge the Planning Commission to add the recently proposed Climate Change Element to our current update of the Comprehensive Plan. There is nothing new in the attached Element, as each part carefully references commitments that the County has already agreed to regarding climate action in San Juan County. Integrating the dispersed Climate Change Elements into one Comprehensive Plan Element will emphasize our goals to the local community and thereby strengthen San Juan County's commitment to prioritizing Climate action.

Sincerely,  
Charles Greene
