

2022 Road Levy Facts

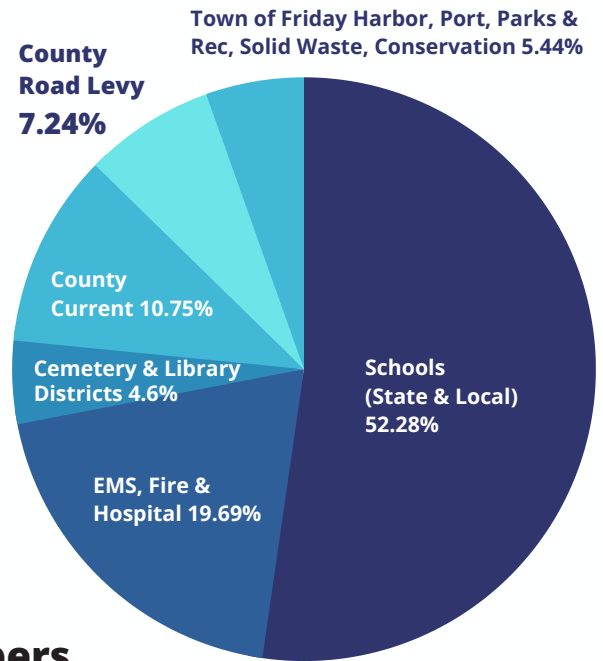

Your November ballot will include Resolution 20-2022 - a proposition to increase the road levy. It is a one-time, permanent levy lid lift for the county road fund.

About the Road Levy

The County is responsible for over 270 miles of public roads, thousands of culverts, numerous marine facilities, bridges, trails, and other transportation-related facilities located on seven different islands.

San Juan County's road levy is the lowest in the state. Our road levy is currently 7.24% of the total property tax.

The levy is expected to generate an additional \$4 million in revenues for the road fund every year which will support repairs and replacements of failing culverts, updates to marine facilities, and widening of shoulders for multi-modal transportation.

Let's Do the Numbers

Your assessed value X \$1.00 levy / 1,000 = your new tax

The proposed levy raises the current rate of \$0.56 to \$1.00 per \$1,000 of assessed value. This increase, when using the current levy rate as an example, would increase the road fund from 7.24% to 12.28% of the total property tax. This means a home with an assessed value of \$800,000 would add \$352 to its tax bill.

Important Facts

1. **Roads and Culverts:**
 - Since 2020, four County roads washed out due to failed culverts.
 - The road levy provides necessary funding to replace undersized and failing culverts.
2. **Marine Facilities:**
 - Over a dozen County-owned and operated marine facilities serve as essential links to goods and services, as well as emergency response vessels.
 - The road levy provides funding to address capital repairs for numerous marine facilities with structural deficiencies.
3. **Enhanced Shoulders:**
 - Roadway shoulders are essential for safe, non-motorized transportation and recreation.
 - The road levy prioritizes safety for cyclists and pedestrians by funding enhanced shoulders along key island corridors.
